Skills

React-native, PHP ,Wordpress, Vue.js, Javascript, jquery, HTML, CSS

Experience

May 2019 - Present (~ 2 years)
Web Developer – **Webcodice, Amritsar**

- Working on live website providing best in 360 views to our International clients. Our software provides 3 different tour designs. The project is live at www.realitis.com .
- Designed complete end-to-end customer selection plans to payment system. Customer can select one of the the plans and added to his cart for checkout and then proceed to payment system. Designed this workflow in both PHP and wordpress.
- Designed website login system in PHP. Also incorporated Google and Facebook login.
- Each tour can have it's own 360 views. This is implemented in krpano..
- Each tour can have it's own mini-website. This is implemented in wondercms.

December 2018 - May 2019
Web Designer – **OXO SOLUTIONS, Amritsar**

- I designed some templates with html, css, wordpress and aione framework. Templates designed by me are still live today.
- My templates design links are: https://ngo.darlic.com , https://music.darlic.com
